AAPSO ON MOSCOW YOUTH FESTIVAL

Calro, The Permanent Secretariat of the Afro-Asian People's Soliderity Organization has issued a atalomoni in which it calls on all the democratic forces to take on activo part in the preparations for, and holding of, the 12th World Feativel of Youth and Studenta in Moscow next year. The atatement stresses that the AAPSO ties atways been completely on the side of the young people who are the fature of the world in their struggle against the policies of exploitation, aggression, and violence pureued by forces of imperialism. racism end zionism. The organization welcomes the participants of the festival who are to get logether naxt summer in Moscow. This important lorum will undoubtedly make a major conirthulion to the atrengthening of the anti-imperialist youth soildarity, to peace and security on the planet.

that at a time when a threat of nuclear elitainotion is hovaring over mankind, a threat cause hy the hegemonianc policies of the United States and other NATO coantries, the 12th Youth Peetival with its motto, Anii-imperialist Solidarity, Peaca and Friendship" will play a mojor role in the cause of mobilizing peoples to light for peace, independence, democracy end social progress. At the forum in Moscow, representatives of youth from all the continents will else celebrate such remarkable jubilees of the year as the dotin enniversary since the victory over fascism, the tenth anniversary since the aigning of the Final Act of the Helsinki Conference on Security and Cooperation, and elso the 40th anniversary since the foundation of

DOW CHEMICAL VERSUS PEACE

The operation Dow Chemical near the town of Tacural on the Tocantins River, jadging from date provided by S. Poroira of the Brazilian ecological organi-zation "The Movement for Life Protection", le a model, raduced teniold, of the crima the USA committed in Vietnam; tha spreyed eroa escaedod 2,490,000 sq km, the number of victims raechod 7,000. Two thnoes were wiped ent. but this is passure wheel evit, but this is passure for the Portlagon, since the cilicial history of the US Army Chemical Corps prides itself with the distribution of 200 xmethox-infected blankets by white colonists as a facility to white colonists as a "giff" to American Indians, who only xtood for good relations with the newcomers.

The flooding on Saptembar 6, 1984, of the defoliant-sprayed zone in the Amezon basin obviously cannot prevent the horrible acological affects but rether hinders investigation into the crime, to the expectation at Dow Chemical. Fect is that dloxin ts epread by undarground weter end kills off meny species of plant and enime! Itto ____ some forests will need between a

to grow anew.

Whetever be the case the condusions made by researchers on vogetation in Vieinsm are quits applicable to the Tocentins River incident: the use of defoliant conteining diosin lad to the dastruction of all imbar resourcer in the affected erass and the cassetion al growth for lifty to yeers: the inriebility walar and citmetic regimes, and the destruction of animat and human habitetions. The lend sprayed by Dow Chemical defoliants with remain scorched and until for habitation for many years to come.

years to como. Such ix the conclusion of sci-entists from 22 nations who at-tended en international symposium on the use of detolisms and herbicidex for relitizely ends, end their lesting effects on men and nature, held test January in He Chi Mink City. Its outcome, ecording to many of the many of the many of the men and the me cording to meny of them, was an indictment of those responsible for the chemical war in Vietnamend those now planning for nnother such war.

In poblic, Washington and the pany preferred, at the last minute, to call if quits with the plaintiffs

vele companies, among them the Dow Chamicel, were esempted from eny control.

tis still not known what happened to the millions of gallons of the "egont orange" fil contended the highest percentege of diosin; laft et the Pentagon's disposal efter the Rench Hend operation during which it was sprayed in Vietnem. There is much tood for thought, too, to tects, cited in the book "Operation Ranch Hend: the Air Force and Herbicidas in South-Eest Asia, 1361-1971", by Williem A. Buckinghem to the effect that the US Army Corps of Engineers denied that diosin presents a lethal danger. When in 1979 ecologists Sem Epstain and Barry Commoner succeaded in getting tha Environmental Profession Agency ptaco a ban on the manulacture of detotients containing dioxin, the Dow Chemical managed to get the ben largelity sat aside under the excessions. the US Army Corps of Engineers ly sai aside under the excusa that the ovidence was mishandconcluded that "crop destruction and detolletion were militarily lad. Lefar when e group of scientists, led by world-lamous American Protessor Arthar Westing, co-euthorad the book "Harvest of Death" on the US chemical warfare in Vietnam, the

Apparently the Dow Chemit ars criminal esperiments in Brexil should be seen precisely chemicsi warfare in Vieinam, the euthorities end the compeny tried first to ben its publication and then worked for nearly a decade to hinder its circulation in the Sietes, Prior to the atorameniloned symposium in Ho Chi Minh they worked hard to prevent the Western researchers from thix perspective. It seems the choice of the region was not accidental — It is poorly open-ad up, has spense population, and is a piece where the rein torasts of Western Amazon meet with the xevenness of the South-Amexon tebteland, in terms of naturel conditions it ix quite etmilar to some areas in Colombie, Venoxuole, Central Americo end the Ceribbean Ixlends. The old parts of the Slovak capital of Brettaleya, which is seventy centuries old, offract close effection of both historiane end erchaeologists. Thirty years ago, the historical centre

of the city was declared a his-ioricat end architectural pre-serve, While studying and re-atoriog the Palfi Palace, which is atoriog the Paifi Palace, which is one of the historical sights in the centre of Grotislava, the scholars made another discovery recently. It turns out that the building whose construction was attributed to the first half of the nineteenth century, concasts e tourleanth-century Gothic etructure (cree in Bretislava) which testifies to a high level of development of urban construction art is Bratislava in construction art is Bratislava in the Middle Ages.

FROM the SOVIET PRESS

WASHINGTON'S SPACE ADVENTURISM

This is the title of on article contributed to the KRAS-NAYA ZVEZDA newspaper by Alt Force Mojor General G. Shonin who, omong other thinge, writes:

This milliorization of outer space has electrent terrestrial iondmarks. Weekington's plans seem to have locussed all the milliory preparations which threaten the world with global catastrophe. We should have no illusions in this respect. The space military programmes of the United States are most closely linked with the buttleng up and perfection of strategic cliensive forces, perfectlarly nucleor, the ercotion of such lirel-strike weepons as MX intercontinental beliatio missiles, ballistic missiles on board the Trident-2 submortnes, long-range missiles, B-1 atrike bombers, and the deeligning of new types of weapons. new types of weapons.

All these ore links in the chain of preparations to achieve milliory superiority for the United States. The very concept of "star wars" is essentially an expression of the desire at the USA to dominate the world.

FRUITS WITH BITTER TASTE

US leaders are stubbornly spreading the to the effect that the Saviet Union is interested in instability in the Middle Soal, writes in PRAVDA Pavel Demehenko. Therefore, they oliege, if any portiol "pocification" is ever possible in the region, it may be reached only on one indisponsable condition — discontinuation of "Soviet influence". It is clear that this propagando trick is used to comoulogo the airtving of the US administration to airtka deepor roots in that part of the world, President Reagon, his Secretaries of Stole and Deiense repeatedly declared that the isotolion of the USSR from the Arab world was one of the main objectives of the US Middle East policy. Middle East policy.

All the laur years since the administration essumed ellico the White Itemsa, the Sinto Deportment and the Pentagon have been working in their direction. But the truits of sach on unrealistic policy inve o bitter taste for Washington.

TWO TRENDS

Analysing the rood travelled by the Soviet Union and France utter diplomatte relations between them were established 60 years ogo, E. Arsenyev wertes in SOVIETSKAYA

Two trends are in elernal collision in French policy towards Two trends are in elernal collision in French policy towards the Soviel state; one is based on a realistic assessment of the interests of peace and security, while the other is iermanted by the class ideology of the bourgeoists. Often the two trends surface simultaneously, leading to signags in French policy and uneven development of bilateral relations. And if in the linal analysis the policy of multiply advantageous cooperation what the upper hand, it is to a large extent due to the objective coincidence of jundamental national interests of objective coincidence of fundomental national interests of both nations in the struggle for proce and security in Europe, the paper points out.

STAKING ON TERROR

The spseches of the US Secretory of Stole George Shults in a New York synagogue and of US Vice-President George Bush to the American Zioniet Organization, in which they spoke of trashington's intention to use force on a large scale in the areas of the world which serve, occording to the US administration, "as a refuge for terrorists" — is the subject of a commentary by TASS political analyst Yu. Karnitov, He writes in particular formative Washington tried of least to somehow cambulage its interterence in the allotts of sovereign countries and peoples, whereas now, as we can see it from the stolements of Shults and Bush, the policy of such an interterence is proclaimed openly and, besides, a certain aggressive "conception" has also been worked out, meant to fusilly any American intervention, any act of tyranny and international gangsterism. The speaches by Shults and Bush have realitimed that Washington has decided fond it is known on what grounds) to assume the "right" to determine what states or "democratic" and what are not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic" and what ore not, which to enless the states are "democratic and what ore not, which to enless the states are "democratic and what ore not, which to enless the states are "democratic and what ore not, which to enless the states are "democratic and what ore not used to the stat states ore "democratio" and what ore not, which to enter in the case of the regime of Pinochet in Chile or South African racisis - on the list of advocates of "freedom" and of whom to open lire from big caliber guns, as was the case in Lebenon and elsewhere,

tion of the ancient lown. Finds at Vyborg fortress

A sword with the femous "Hitzelin" tredemerk, mede eight cooluries ago by middle eight cooluries ago by middle Rhine ermothers, was discovered by Soviet archaeologists on the grounds of the fortress in the city of Vybeig so the Saife Sai. There are only 12 such swords in world collections to day, with five of them being kept at Soviet museums. One such sword was found during excavations on the Moscow Kremlin. The newly found "Hissim" sword is one more bit of syldence showing that Vyborg has a fonger history than was be-lieved until now. An expedition

of Leniograd Branch of the Institute of Archaeology, the Academy of Sciences of the USSR, upearthed remnants of an old ceillament beneath the foundation of the fortress which was erected by the Swedes in 1993. The great number of objects of sixt and things of daily use of Karelian or Novgorod make indicate that already then, more than a thousand years used Slaves and Pinns ware living logother. Those were flahermen, artisans and merchants. Bischvations at the Vyborg citadel will be continued. An openair archaeological museum is to be established there.

VIEWPOINT

BEYOND THE PALE OF LAWS Soviet students: KNOWN TO CHEMISTRY The exiometic thesis in eclence that as loog os particles in e solid body cannot move, naithar three components can they mix, has been refuted

Our correspondent has taken Interview from Alexander LUNKOV, Chairmen of the Student Council of the USSR

ot social prosperity

Q.: What lo the coctal status of udents in the USSRI

A.: A law words about whel this contepl limplies. European canierence on the social sielus ni studenis was hold in Efelsiak lasi year, Representatives from nlinosi 50 antinnal, regional and international student and youth argentrallins discussed accessi lillly of education, budgeting o instruction and living conditions of similants.

Q.: Lel's discuss each of these items in particular, starting from accessibility of education.

A.: All forms of education in the Saviet Union are free in all The expenses are shouldered by the state. For example, a year at school costs about 200 raubles at a specialized secondary school -nearly 700, and no a university - mage than 1,200 roubles.

Q.: As lar as I remember, a few years ago training a univer-sity student cost the state 1,002 roubles a year, loday It is 1,200 Why sar

A.: The increasing education cods in general are characteris-He of the higher school in odvanced countries. Colleges and universities are supplied with more allyagred and, hence, cust-Her equipment, instruction aids, etc. But while in the US cotleges the growing higher educa-tion costs (in 1983 and 1984 by ea everage of 10 per ceot eo oually directly tald no its eccessibility, to the USSR it pos-sed unnoticed for aludents and their parents: invesiments iram the state hudget grew simulteneously, la 1980 some 40,000 militon roubles were elloceled from the stele hudgel for the development of educellon, neleace and culture, la 1983-44,600 militoa rouhles. This year enother 3.7 per ceat grawth over the previous year is expected. Q. What is the social compa

A.s According to sociologice research, emong all direl-year students in the 1860-1070 ecad emic yeer the children of workers constituted 37.1 per cent and ten years later — 47.3 pe ceal. In some Soviet cities, such as Moscow sad Leniagred, where there are meny office workers the number of students from tectory workers' families is some what lower, to comperison with major industrial and agricultural ceutres, where children at workers end farmers make up as many os two-thirds of the fotal

to official figures, only 35 per cent of students get accommoda-tion at hostels in Britain, 33 per cent in Raland, 30 in Sweden. 16 in Austria and 5 per cent in Switzerland.

FROM the SOVIET PRESS

STUDENT CREATIVITY IN USSR

This is the subject of on article in PRAVDA, Behind these creative octivities, writes the newspoper, are great names in Soviet science.

The this student creative club was organized in the Moscow Baumon Technical Institute by Nikolof Zhukovsky, Johns of Russian aviulion. Today this scientific-technical society embraces more than 2,500 members, in confunction with whom technicol devices such as the tobal "ATEKT" - meant lot see had research in the shell zone, ffexible-winged sports kile, the radio-controlled oirship "Bumcrang" and the multipurposa acrostat "Alet" were acrosted. Tens, and even hundredo of course and diploma projects by eludants of Baumon institute are recommended for adoption in industry every year.

Today, writes the newspoper, 2.6 million future speclailsts are engoged in reecorch undertokings in higher echools. Every year thousando of gradunics of higher ficules for their inventions and have worthy scientific publications to their execut. There are uctive construclion, technological, architectumi and design bureaus to hundreds of institutions of higher learning.

Severol student creative collectives do not confine their octivities to more project designings they also see to their successful adoption. Especially elective in this sonso ore the construction, scientific-productive, roscarch and design-construction groups. A unique tech-nological process has emerged hero: In the course of the academic year the luture engineers work out important technical documentations ardered by enterprises, while the summer la devoted to tronslating their ideas into

INTERSTELLAR TRAVEL NOT FAR OFF

The development of radio-astronomic facilities gives ground to hope that within the next few decades they will help discover planots oround live-icn stars closest to us, Vsevolod Troitsky, Corresponding Member of the

USSR Academy of Sciences, writes in the newspaper SOTSIALISTICHESKAYA INDUSTRIYA in the urificle titled: "Forecosts. Projects. Quests". They ore more likely to be discovered in the optical, infrored and submillimetre wove bands with the help of extraterrestrial ineioliutions. Inicratellor elilps will be built oral probes sent to one of the nearest stors lying within a dist of 5-10 light years. Of course, they will be sent. In the list place, to a stor which is tound to have planets near It. Such a ship will liy, with the help of a thermo-nucleor engine, of a speed not exceeding 0.1 of light

Giont space eyclems will be used in rodio ostronomy. Such systems will incorporate multo telescopes of over 100 metres with a distance of several hundred thousand kilometres between them (of present the longest dis-lonce between radio jelescopes is limited by the size

Vaavolod Trolisky believed that in the list third of the 21st century one of the probleme to be discussed will be thot of limiting the production of thermonucleor energy, which will then become the dominant type of types of energy which have always existed on earth ao the energy of the wind, tidol energy, solor energy, etc., the utilisation of which does not lead to an additional heating of the plonet.

Finally, special big radio jelėscopes will bo bulli to kooh lor clectromagnetic signale ol orilitelal origin (trom intelligent beings) throughout a perspective wave mage. Signals trom o considerable part ol storo in the golaxy will be observed. The theory of origin and development of extrolerrestrial civilizations will be further developed.

FANTASTIC REALISM OF YOUTH THEATRE

Artistic director Mark Zakharav, who leads the Moecow Lenin Komsomol Theatre, which is often referred to as a theatre for the youth, shares his ideas on theatre performance in the newspoper MOSKOVSKY KOMSOMOLETS: We often four the country and receive numerous icl-

ters. Occasionally in these letters we are accused et "experimentation". However, behind this word is a evident, though reasonable, risk and necessary business.

Today, the theolic is local with form doble competition from the cincino and icievision. Yevgeny Vashur-gov's expression, "fantastic realism" appeals in Mills of the Conference of the Conf There is the need to breathe cheerintness, self-confi dence lato the nudicace, so that things loll in this right ploces in the linal analysis. Hereta lies theather moin rasponsibility. As for methods, they are simply the means of ottoining this supreme goal, indeed, they can be rather of the supreme goal.

be more horrible? The lirat Soviet children's theelres in Leningrad and Moscow, led by Alex-ander Bryanisev and Natalye Sals respectively, were sel up at the height of the Civil War as e promise of a bright tuture, the virtues of which the theatres were lo luculcata in their

Yurl Kiselyov errived to Sere-tov to 1943. The World Wor It was still reging on, but he was assigned the task of seiling up a childres's ibeatre. These were hungery, cold end difficult timas. Like many other ectors, Kiselyev livad right to the ire bouse for teck of alternative accommodation. But they got considerable essistance. Severel actors were even recalled from the front lo support the com-pany — and this was in 1943, Iha year when the fate of the graulest end most borrible war in bumen bistory was belag de-cided. But people believed in

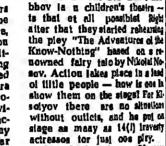

Forly years or so have stapsed sincs. Those who saw Kiselyov's early pleys now come to see them with their grendeous, Kisetyov has produced over a hundred plays on the stega of

the Saratov Children's Theetre and has been bonoured with the bigb distlactions of the Paople's Artist of the USSR and the Order of Lonin.

Kiselyov was invited several times to distinguished adult the-elrae but invertebly refused end would never discuss bla reasons. Indeed, the adult theetre is tise hut Kiselyov bas for 40 years been working for the future — children — which, you would egree, is quile honour-

In general, Kiselyov prefera ecitons to words. Recently be produced the ploy "A Sausage, Boetswain and Olbere" heaed on u novel by noied Swedish writ-er Astrid Lindgren. Not long ago the Seralov compeny visited France, and there were vieward who doubted that such a professional ibeatre, with an enviubla director und axcelleut actors, could emarge to far-away Sarniov, Some even went so far as lo claim lbet the uctors came from Moscow... Kiselyov would not urgue fba point, beliaving that the (beatre speaks for it-self. As tor the actors — just come to the theatre atudio, and you will see the way felented but taept youngelers develop into fine actors.
